

Q) Try creating the following content structure and identify the order in which the following scripts will be resolved.

```
GET /sample.print.a4.html (sling:resourceType="item")
```

```
item(folder)
```

```
-print.jsp
```

```
-print.html.jsp
```

```
-print.a4.html.jsp
```

```
-a4.html.jsp
```

```
-Get.jsp
```

```
-html.jsp
```

```
-sample.jsp
```

```
-item.jsp
```

```
-print(folder)
```

```
  - a4.html.jsp
```

```
  - html.jsp
```

```
  - print.jsp
```

```
  - a4.jsp
```

```
  - a4(folder)
```

```
    - html.jsp
```

```
    - a4.jsp
```

ANSWER: -> denotes change in folder hierarchy

- 1) print -> a4.html.jsp
- 2) print -> a4 -> html.jsp
- 3) print -> a4 -> a4.jsp
- 4) print -> a4.jsp
- 5) print.html.jsp
- 6) print -> html.jsp
- 7) print -> print.jsp
- 8) print.jsp
- 9) html.jsp
- 10) item.jsp
- 11) GET.jsp
